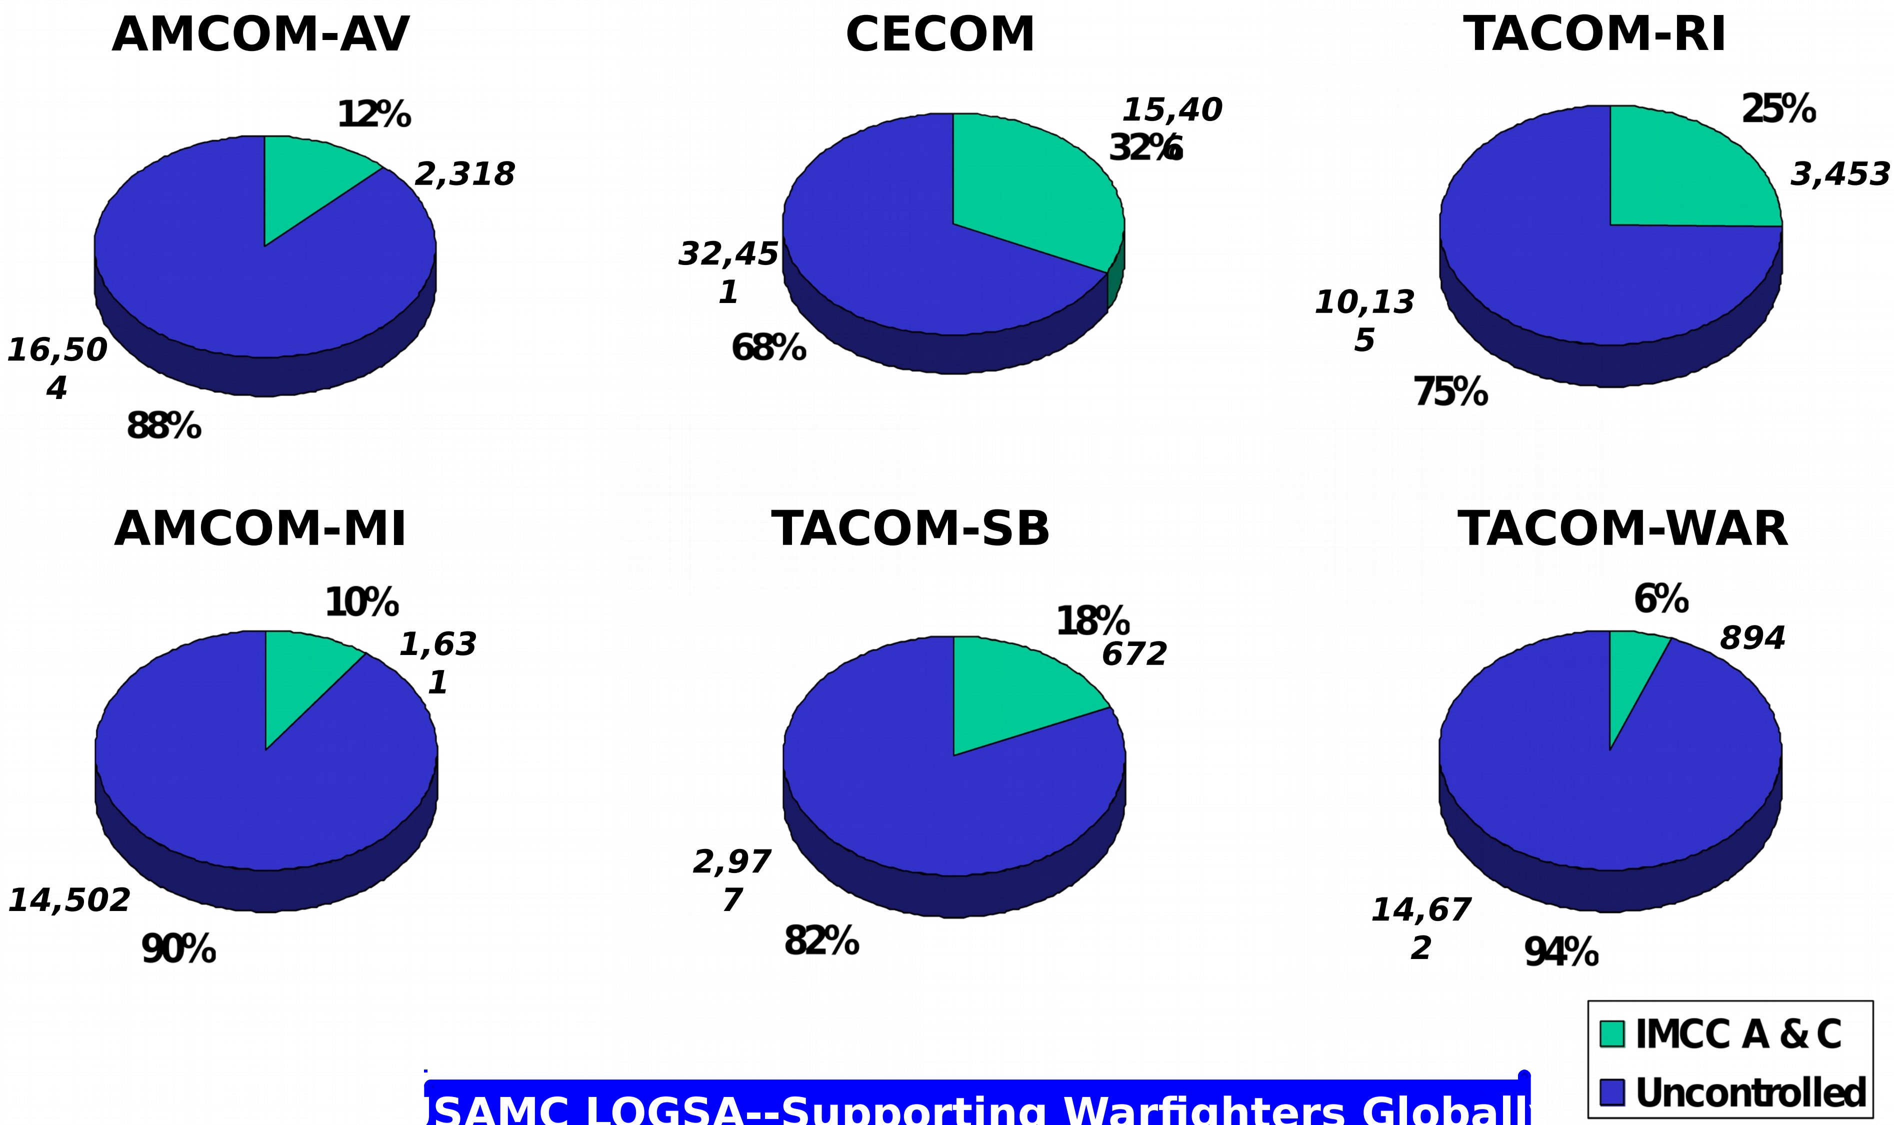
IMCC A and C vs. Online Processing Secondary Items Managed by ICP – Dec 05



Breakout of Controlled Items

	IMCC "A"	IMCC " C"
AMCOM-A	1,139	1,179
AMCOM-M	1,185	446
CECOM	15,193	213
TACOM-W	510	384
TACOM-R	1,646	1,807
TACOM-SB	548	124

IMCC "C" requisitions are run thru the Control Item Logic File (CLF). CLF is an IMMC tool that facilitates automatic processing. CLF completes processing for many "C" coded items based on parameters placed in the CLF, e.g., designated DODAACs, priorities, quantities, etc. Only requisitions not meeting CLF parameters will ever kick off-line for processing.
